I would consider the GC to be part of the air pollution control equipment.

Hello Mr. Rheaume,

During review of the tax exemption letter and memos it was noticed that an Air Pollution Control Device-Gas Chromatograph (GC), used to measure gas pollutant concentrations at both the inlet and outlet of the bio-filter is mentioned at the end of page 2 in the request letter. Should this equipment be included in the Air Pollution control equipment that treats or prevents Air Pollution?

Please, let me know if you have any questions.

Respectfully,

Eleanor Goins, M.S.
