Mitchell Williams' experienced team of attorneys, patent agents and technical advisors helps clients who use innovation and technology to gain a competitive advantage obtain and protect intellectual property rights in the United States and around the world. We provide the full range of services, from patent and trademark negotiation to federal and state licensing and copyright registration.

We also have extensive experience with negotiation of confidentiality agreements pertaining to intellectual property rights and security interest in patents, and in litigation behalf of plaintiffs and defendants in trademark infringement, copyright infringement, misappropriation of trade secrets and unfair competition cases
