Wild Ones Presents/Native Plants, Phytoremediation & Green Infrastructure: Eric Fuselier (Olsson) December 9th Webinar

12/06/2021

Mr. Eric Fuselier, PWS, will undertake a webinar presentation on December 9th titled:

Wild Ones Presents: Native Plants, Phytoremediation & Green Infrastructure: How Native Plants Can Be Used to Improve Environmental Quality ("Presentation")

Mr. Fuselier serves as an Environmental Scientist in the Northwest Arkansas Office of Olsson.

The *Presentation* is stated to provide knowledge about:

. . . how native plants and phytoremediation can be used to improve soil, air and water quality by removing or transforming common environmental contaminants found in urban, suburban and rural settings.

The *Presentation* will address topics relevant to green infrastructure or large-scale remediation projects. However, they are also stated to be potentially applicable to residential, commercial and municipal landscaping projects.

Topics to be addressed include:

- Rain gardens
- Stormwater management
- Pesticides and heavy metals
- Carbon sequestration
- Outdoor air quality

The webinar is free and registration can be found [here](#).
