Improving Stormwater/Outdoor Air Quality/Soil Contamination: Eric Fuselier (Olsson) Arkansas Webinar Series Addressing Role of Native Plants

03/30/2022

Mr. Eric Fuselier, PWS, will be undertaking a webinar series in April regarding the role of native plants in addressing various environmental issues.

Mr. Fuselier is a Project Scientist/Environmental with Olsson's office in Fayetteville, Arkansas.

The webinars are hosted by Wild Ones: Native Plants, Natural Landscapes.

The series is stated to be a more in-depth focus on how phytoremediation (i.e., using plants to clean up soil, air, and water containing hazardous contaminants) works and covers a wide range of contaminants and native plant species.

The webinars will be held on the following dates:

Thursday, April 7th, 6pm (Central Time) – Native Plants for Improving Stormwater

Thursday, April 14th, 6pm (Central Time) – Native Plants for Improving Outdoor Air Quality

Thursday, April 21st, 6pm (Central time) – Native Plants for Improving Soil Contamination
