Hazardous Waste Enforcement: U.S. Environmental Protection Agency and Sterling, Kansas, Oilfield Chemical Manufacturer Enter into Expedited Settlement Agreement

02/09/2023

The United States Environmental Protection Agency ("EPA") and JACAM Catalyst, LLC ("JACAM") entered into a January 3rd Expedited Settlement Agreement ("ESA") addressing alleged violations of the Resource Conservation and Recovery Act ("RCRA") regulations. See Docket No. RCRA-07-2023-0010.

The ESA provides that JACAM is the owner or operator of a facility ("Facility") in Sterling, Kansas.

EPA is stated to have inspected the Facility on March 1 and 2, 2022. As a result, the ESA provides that the findings during the inspection and additional investigations indicated JACAM violated the following requirements of the RCRA hazardous waste regulations:

- Container holding waste must always be closed during storage, except when it is necessary to add or remove waste
- Level 2 container must operate with no detectable organic emissions as defined in § 265.1081
- Requirement that a small quantity handler of universal waste must contain any lamp in containers or packages that are structurally sound, adequate to prevent breakage, and compatible with the contents of the lamps; such containers and packages must remain closed
- Requirement that each lamp or a container or packaging in which universal waste lamps are contained must be labeled or marked clearly with one of the following phrases:
 - Universal Waste – lamp(s)
 - Waste Lamp(s)
 - Used Lamp(s)

The ESA assesses a civil penalty of \$11,000.

A copy of the ESA can be downloaded [here](#).
