

# Conservation Reserve Program (CRP)

General Signup 64  
May 12, 2025 through June 6, 2025

## Overview

USDA's Farm Service Agency (FSA) will conduct a general Conservation Reserve Program (CRP) signup from May 12, 2025 through June 6, 2025. CRP is a federally funded voluntary program that contracts with agricultural producers so environmentally sensitive agricultural land is not farmed or ranched, but is instead devoted to conservation benefits. CRP participants establish long-term, resource-conserving plant species, such as approved grasses or trees (known as "covers") to control soil erosion, improve water quality, and develop wildlife habitat. In return, FSA provides participants with rental payments and cost share assistance. Contract duration is between 10 and 15 years. Accepted contracts for this general CRP signup period will become effective Oct. 1, 2025. CRP is authorized by the Food Security Act of 1985 and was reauthorized by the Agricultural Improvement Act of 2018 (the 2018 Farm Bill). The 2018 Farm Bill was extended by the American Relief Act, 2025 (Pub. L 118-158) which extended authority for the CRP program until September 30, 2025. FSA administers CRP, while other USDA agencies and partners provide technical support.

## Submitting General CRP Offers

Land not currently enrolled in CRP may be offered during this general CRP signup period. In addition, CRP producers whose CRP contracts are expiring on Sept. 30, 2025, may offer the expiring land in general CRP signup 64. To submit general CRP offers, producers must contact their local FSA office. FSA will accept general CRP offers only during the signup period.

## Who is Eligible?

To be eligible for general CRP, a producer must have owned or operated the land for at least 12 months prior to the end of this general CRP signup period, unless:

- The new owner acquired the land due to the previous owner's death;
- The ownership change occurred due to foreclosure where the owner exercised a timely right of redemption in accordance with state law or;
- The circumstance of the acquisition presents adequate assurance to FSA the new owner did not acquire the land for the purpose of placing it in CRP.

## What Land is Eligible?

To be eligible for general CRP, land must be cropland (including field margins), planted, or considered planted, to an agricultural commodity four of the six crop years from 2012 to 2017 and be physically and legally capable of being planted (no planting restrictions due to an easement or other legally binding instrument) in a normal manner to an agricultural commodity. Alfalfa or other multiyear grasses and legumes grown in a rotation not to exceed 12 years may also be eligible.

## More Information

Visit FSA's CRP webpage  
<https://www.fsa.usda.gov/resources/programs/conservation-reserve-program>.

To locate your local FSA office, visit: [farmers.gov/service-locator](https://www.farmers.gov/service-locator).

This fact sheet is provided for informational purposes only; other restrictions or requirements may apply. Consult your local FSA office for details.

## Additional Cropland Requirements

In addition to the eligible land requirements for the general CRP signup period, cropland must meet one of the following criteria:

- Have a weighted average erosion index of eight or higher;
- Be expiring CRP acres or;
- Be located in a national or state CRP conservation priority area.

## CRP Payments

FSA provides producers whose offers are selected for general CRP enrollment with annual rental payments and cost share assistance.

- **Rental Payments:** In return for establishing permanent resourceconserving covers, FSA provides annual rental payments to participants. Rental rates are based on the relative productivity of the

soils and county cropland rent rates factored to a statutory 85 percent limit. County Office staff will calculate the maximum CRP rental rate based on the land being offered. Producers may reduce the per acre rental rate offered to increase the likelihood their offer will be accepted.

- **Cost-Share Assistance:** FSA provides cost share assistance to participants who establish approved practices on land enrolled in CRP. Cost share assistance cannot exceed 50 percent of the participant's eligible costs and is not available for any management activity.

## Ranking General CRP Offers

FSA will rank offers for the general CRP signup period according to the Environmental Benefits Index (EBI). FSA collects data (primarily based on location, soils information and

selected conservation practice) and determines the environmental indices for the land offered. FSA ranks each eligible offer in comparison to all other offers and selects from that ranking. After the general CRP signup period ends, the Secretary of Agriculture will determine an EBI cutoff score used by FSA to accept and reject offers. Those who have met previous EBI thresholds are not guaranteed a contract under this signup period. Producers may consult with local FSA and Natural Resource Conservation (NRCS) staff on how to maximize EBI points and increase the likelihood their offer will be accepted.

## Additional CRP Signup Opportunities

In addition to the general CRP signup 64 period, producers can offer their most environmentally sensitive land in continuous CRP signup 63 or in the upcoming Grassland CRP signup.
