
Forest Management Webinar

Friday, August 28, from 11:00 am to 12:30 pm

The Alliance will be providing an educational short class for landowners of forested lands online via webinar. This is a great opportunity to learn how YOU can improve YOUR forest to increase wildlife diversity, reduce stormwater issues, and improve the aesthetic appeal of your forests.

Our speakers will include: Raven Lawson, Watershed Protection Manager with Central Arkansas Water, Chas McCoy, Watershed Specialist with The Nature Conservancy, and Hugh Lumpkin, Private Lands Biologist with the Arkansas Game and Fish Commission. Raven is an expert in the role healthy forests play in protecting water quality, and how to manage forests to promote the diverse understory vegetation necessary to filter stormwater and promote watershed vitality. Chas has extensive experience managing forests for conservation, including one of the most ecologically diverse forests in the entire state, the Rob and Melani Walton Preserve. Hugh is an expert in promoting our native game and non-game species in forestlands, which require healthy plant diversity to thrive. This program is free, and open to the general public, please register below.
